1 Introduction

This is where your text goes. If you're new to \LaTeX , check out Overleaf¹, an online \LaTeX environment where you can edit and render your documents. They also have a very useful [getting started guide](#).

And here's some math:

$$\int_{-\infty}^{+\infty} e^{-x^2} dx = \sqrt{\pi} \quad (1)$$

You can also make numbered lists:

1. Thing 1
2. Thing 2
3. etc.

Or bulleted lists

- Thing 1
- Thing 2
- etc.

It shouldn't get much more complicated than that.
